DETAILED ACTION

Title

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is no antecedent for "the MOS transistor under the operating power supply voltage". Also, it is not understood how a "transistor" can be "under" a "supply voltage".

Claims 2-5 are rejected for the reasons discussed above with claim 1.

Claims 6-16 are rejected for similar reasons as claim 1-5.

In claim 6, line 16, there is no antecedent for "the converted voltage". As seen, in lines 11-14, "current-voltage conversion circuit" provides a voltage that is a converted <u>current</u>. Thus, it is suggested that "converted voltage" be changed to either --converted current-- or --voltage--.

Claims 7-12 are rejected for the reasons discussed above with claim 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2816

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Merrill et al. (USPN 5,397,934).

With respect to claims 1-5 and 7-16, Merrill et al. disclose, in Fig. 2, a circuit comprising: "a main circuit (22)"; and "a substrate potential control circuit (remainder of circuit)", all connected and operating similarly as recited by Applicant.

Allowable Subject Matter

Claims 6-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

None of the cited prior art references disclose a circuit having the specific structure of claim 6 wherein the voltage "from the current-voltage conversion circuit is equal to the predetermined operating power supply voltage value of the main circuit". As seen in the reference to Merrill et al., as well as other of the cited references, the voltage "from the current-voltage conversion circuit" is <u>divided</u> from the "predetermined operating power supply voltage".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terry Cunningham whose telephone number is 571-272-1742. The examiner can normally be reached on Monday-Thursday from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
